## LEADERSHIP

Environmental policy

 Roles, responsabilities & authority within the organization

#### Zokit.

#### **ENVIRONMENTAL POLICY**

Zokit specialises in helping business professionals make new connections and build working relationships.

The Zokit team is committed to the care of the environment and is keen to promote awareness of sustainability within its members.

When organising events, care is taken to ensure that Zokit minimises its environmental impact by:

- Choosing venues that can demonstrate a commitment to sound environmental and events management (possibly through certification to Standards such as ISO14001 and ISO20121).
- Choosing venues that can be accessed by public transport, wherever possible.
- · Encouraging car sharing
- Encouraging guests to car share with a member by charging the guests at the member rate.
- Striving to run ticketless events by encouraging members not to print event details.
- When working with independent caterers, choosing those that source food locally.
- Minimising food wastage by submitting final member numbers to caterers the day before an event to ensure the right amount is prepared.
- Anticipate that there will be a small percentage of people that cannot attend, and reduce final number accordingly.
- Securing partner details with local businesses to encourage member to shop locally.

This Policy has been communicated to all our members and is published on our website.

## PLANNING

- Actions to address risk associated with threats & opportunities
- Environmental aspects
- Compliance obligations (Legal & other requirements)
- 0
- Environmental objectives
- Planning actions to achieve objectives
